Variety Specifications

- Type** - Barley
- Variety** - Schooner
- Pedigree** - Franklin/VB9104
- Date of release** - 1983

Buloke is best adapted to low to medium rainfall districts of southern Australia. It has a tolerance to pre harvest sprouting which is similar to Gairdner and has a superior gain plumpness in comparison. Buloke produces malt with high extract, diastase and fermentability levels.

Growing/Grain Specifications

- Grower** - Stuart Whytcross
- Location** - Wongabeena, Barellan NSW Australia
- Sown** - 21th April 2013
- Harvested** - 18th November 2013
- Protein** - 10.4%
- Moisture** - 10.6%
- Weight** - 75kg/hL
- Retention** - 97%
- Screenings** - 1.6%

A dry finish to the season once again saw yields lower than average. Grain quality across the board was above average, with this Schooner variety once again out classing others across the board with exceleent protein, retention and screenings idea for malting.

- Kolbach Index** -
- Diastatic Power** -
- Steeped** - 12th November 2014
- Kilned** - 18th November 2014
- Roasted** - Yes, See bag for roasting date.

This is a ramped up version of our amber malt, produced by slowly increasing temperatures resulting in a sharp somewhat acrid malt that is a must in any traditional Porter recipe. Moderation is the key with this malt, imparting a subtle bitterness, big bold flavour and classic dry astringent like finish. Use this in any traditional darker style ale.
